

DESCRIPTION OF PROJECT

Preamble:

The British Columbia Camping Association is a non-profit standard-setting body for sleep-over and day camps throughout British Columbia. The organization works to ensure the safety and well being of those attending camp programs. The BCCA directly interacts with the following groups: member camps, parents/guardians of campers, public-at-large and various agencies related to programs and services commonly engaged in at camp.

Background to Proposal:

During 2010, the BCCA contracted a programmer to re-design our website, including the addition of new features to improve our interactions with our members, streamline our services and improve the end user experience. The project was mostly completed using the Drupal platform, however various pieces were left incomplete. The BCCA requires that this project be completed prior to the end of February 2011.

Details of Proposal:

There are specific areas from the original project that require improved functionality. These include:

- Job Postings
- Member Management
- Integration with hosting platform
- Others?

Competencies of Programmer:

- Three years experience with Drupal
- Three years experience with MySQL
- Experience with Linux OS
- Experience with Apache Webserver
- Competent PHP programming language

Timeline:

Completion of project by March 1st, 2011.

Application:

Submission of interest can be sent to president@bccamping.org . Please include your cover letter and references.
